

Mission: To create world-class optical imaging systems that collect ultra-high resolution video footage and image data while offering reliability and ease of use in the process

In business for
over a decade

130+ clients in
over 30 countries

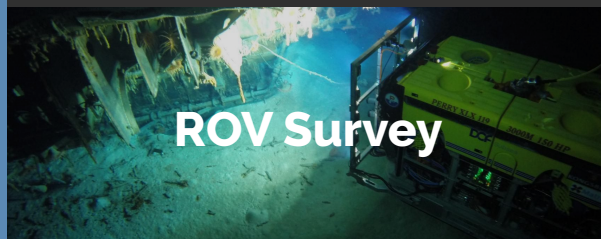

Located in
Newfoundland &
Labrador Canada

PRODUCTS

- 4K and digital stills camera
- DVR + Overlay
- LEDs
- Lasers
- Video Streaming

SOLUTIONS

Some examples of our solutions used for studies:

University of Washington has been successfully running time-lapse on the seafloor using our **Ocean Observatory** system **since 2015**.

Researchers from **Memorial University** and **Fisheries and Oceans Canada** collected **258 hours of footage** for a Greenland Shark study with the help of our **Battery Powered Solution**.
